Sarah Henia

AI Solutions & Governance Engineer

Tunis, Tunisia · Open to relocation | +216 20 933 908 | sarah.hania15@gmail.com
Portfolio | LinkedIn | GitHub

SUMMARY

AI solutions engineer who turns business needs into governed AI systems that run in production, and can explain them to engineers and executives alike. Designed the governance of three real agentic systems (GDPR, NIST AI RMF, ISO/IEC 42001), managed a product roadmap, and presents in English, French and Arabic.

EXPERIENCE

The SamurAI *Remote, USA*
Software Architect & AI Solution Integrator *Feb 2026 - Present*

- Designed and built **Dawn**, an autonomous **AI agent** for project management, live in production from March 2026: turns recorded meetings into tasks with owner, priority and due date, with **human-in-the-loop** approval before any write to Microsoft Planner.
- Designed its **governance and security layer**: identity gate, per-agent policies, HMAC-signed agent messages, audit log, confidence gating, and sensitive data routed to a local Llama model.
- Designing and building a **multi-agent market-intelligence system** for a Middle East cybersecurity client: bilingual (English/Arabic) **data ingestion**, classification and schema-enforced **LLM extraction** into a **SurrealDB knowledge graph**, with human review before any CRM write.
- Designing its **AI governance**: an **AI gateway** for every model and tool call (credential, budget, trace), controls mapped to **NIST AI RMF** and **ISO/IEC 42001**, and **evaluation metrics** on a labelled set run on every change.
- Engineered its **graph memory**: a SurrealDB **knowledge graph** with **hybrid RAG** (vector search plus recency boost) and a **Redis context cache (CAG)**, integrated with the **Microsoft Graph API**.

Product Manager *Aug - Dec 2025*

- Managed the roadmap and backlog of **Dojo**, an AI-powered platform that generates on-demand test labs, turning stakeholder needs into specifications and sprint priorities.

CED Tunisia *Tunis, Tunisia*
Software Engineering Intern *Feb - Aug 2026*

- Built **Collaboris**, a real-time user-presence library for enterprise web apps, shipped as two installable packages: an **Angular 19** library (npm) and an **ASP.NET Core 8** SDK (NuGet) over **SignalR** and **Redis**. Delivered in three releases under department-head review.
- Built **PresenceAI**, the data and AI layer: **change-data capture** streaming live Redis signals into a Cosmos DB journal (**OLTP to OLAP**, Python/FastAPI), queried in natural language through a governed **Azure OpenAI** assistant over **MCP**.
- Implemented **GDPR compliance by design** (data minimisation, consent, 30-day TTL retention, fail-closed access, cost caps) and covered the AI layer with **unit tests**.
- Presented the architecture, governance and business case to the department head and CED executives.
- Deployed the full stack to **Azure** (App Service, SQL Server, Azure Cache for Redis) through **Azure DevOps** build and release pipelines, migrating the API's data layer from PostgreSQL to **SQL Server**.

EDUCATION

National Diploma of Engineer, Computer Science · ESPRIT, Tunis *Sep 2023 - Sep 2026*

Bachelor's Degree, Business Computing (E-Business), with Business Intelligence coursework · ESSECT, Tunis *Sep 2020 - Jun 2023*

SKILLS

Solutions & Product: Solution architecture, requirements and specifications, roadmap and backlog, Agile/Scrum, stakeholder management, technical documentation, executive presentations

AI Governance: AI gateway, guardrails, human-in-the-loop, audit logging, LLM evaluation and metrics, GDPR, NIST AI RMF, ISO/IEC 42001

AI & Data: Agentic AI, multi-agent systems, LLMs, RAG, CAG, graph memory, knowledge graphs, MCP, ETL, change-data capture; Azure OpenAI, OpenRouter; SurrealDB, SQL Server, PostgreSQL, Redis, Cosmos DB

Build & Cloud: Python, FastAPI, C#, ASP.NET Core, TypeScript, Angular, REST, API gateway, Microsoft Graph API; AWS, Azure, Docker, CI/CD, observability (Logfire, Langfuse)

CERTIFICATIONS

Cisco CCNA (2024) · AWS Certified Cloud Practitioner (2025) · NVIDIA DLI, 4 courses incl. Building RAG Agents with LLMs and Adversarial ML (2025)

LANGUAGES

Arabic (native) · English (C1) · French (B2)
